About N•ear

N•ear is dedicated to bringing premium solutions to the two-way radio industry. The company has invented high quality products to improve the conditions for critical communication. N•ear was launched in Copenhagen, Denmark in 2018. The company made strategic moves to establish a US based sales company in 2019, due to a rising demand for N•ear products. The corporate headquarters are based in Copenhagen. Read more about the company at www.n-ear.com.

INVISIO has the exclusive global sales and distribution rights for N•ear's range of covert communication products for military and law enforcement users.

FEATURES

0% EAR FATIGUE

Designed to stay in the ear canal all day. So comfortable that you cannot tell you are wearing an earpiece.

WORKS WITH MOST 2-WAY RADIOS

Connect N•ear to most radio models. We have 1, 2 or even 3-wire setups to fit different radio models. Braided fiber lines for premium comfort and even wireless PTT's.

DUAL-EAR VERSION

For even better comfort, fit, discreteness and audio experience.

PATENTED BEND OVER EAR

The patented bend over the top of the ear is a key N•ear exclusive feature. This supports the perfect fit to your ear and ensures the earpiece from falling out, even during a skirmish.

100% SITUATIONAL AWARENESS

The micro speaker + the open ear tip makes it possible to hear both your surroundings and your radio.
