INVISIO
Drone Aware™

One headset Unlimited versatility Zero compromise

INVISIO T30

The situations shift, the missions change, and the environments differ. But the headset stays the same.

Move from training to missions and dismounted to mounted without compromising the quality of communication and level of hearing protection.

The INVISIO T30 offers unmatched versatility, combining best-in-class situational awareness with active noise reduction and superior INVISIO audio performance. With integrated INVISIO Drone Aware™, it also provides enhanced drone awareness for modern operational environments.

- Versatile connectivity
- Versatile by design
- Market leading hearing protection
- Audio adaptability
- Enhanced drone awareness

INVISIO T30 - One headset

Unlimited versatility

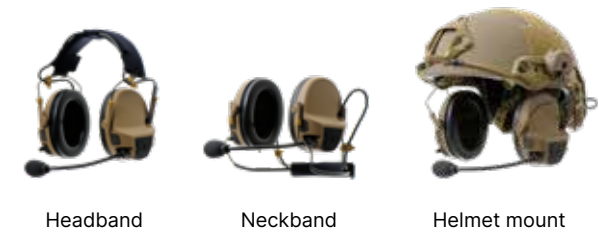

Versatile connectivity	Connects with INVISIO eco-system, third-party PTTs, and digital devices.
Versatile wearing styles	Easy swap between 3 wearing styles in less than 2 minutes. No use of tools.
Versatile power modes	Powered through control units, digital devices, radios, and batteries (110 hours).
Versatile by design	Water and humidity repellent, submersible down to 1 meter for 30 minutes, and adaptable to different microphones.

Zero compromise

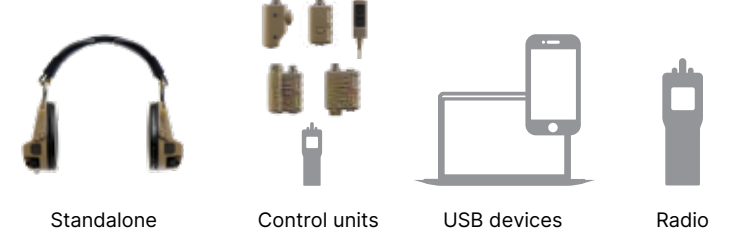

Best-in-class situational awareness	360-degree situational awareness with sound localization down to 9 degrees.
Audio adaptability	Headset-embedded INVISIO Audio, adaptive volume control, and VOX capability.
Market leading hearing protection	31 dB SNR / 33 dB NRS _{A20} hearing protection.* (With active noise reduction)
Next level plug mode	Double hearing protection with optimized situational awareness.
Enhanced drone awareness	Enhanced ability to hear acoustic sound emitted by 5"-10" multi-rotor drones.
